28 VDC AIRCRAFT POWER CABLE

- Meets MIL-C-7974D
- Silver Plated Contacts
- Hypalon Material
- Strain Relief
- Non-Metallic Bands
- MIL-C 5756 Power Cable capability

The aircraft cable is for use with ground power supply equipment for military and commercial style aircraft using a 28.5 VDC connector/adaptor. The individual power conductors are banded together at approximately two foot intervals with non-metallic bands. The connector is solidly attached to the output end of the cable and the other end is supplied with lugs for easy mounting in the GPU. The cable assembly is comprised of two (2) #4/0 AWG single conductor power wires. All conductors comply with MIL-C-5756.
