

MCM

ENGINEERING, INC.

AIRCRAFT CABLE NOSE REPAIR KIT Part No. DA9-5509-4

- Molded Hypalon® Rubber per MIL-R-81828
- High Grade Copper Alloy Contacts
- Beryllium Springs
- Silver Plating per QQ-S-365 Type I Grade B
- Insertion/Extraction Force per SAE AS7974

MCM's replaceable nose kit is designed to fit MCM's field attachable and molded cable heads. These components can be purchased as a kit or individual parts can be purchased. This allows for the replacement of a single worn or damaged component, reducing the cost of repairs. The nose is molded with Hypalon® rubber for durability and the contacts are composed of silver plated high grade copper alloy for a minimum of 90% conductivity. It is designed and manufactured to meet or exceed all applicable requirements of SAE AS7974. A 5/32" Allen Wrench® is included for the removal of the nose and tightening of the contacts, no other special tools are required. The kit contains the parts listed below.

LABEL	PART #	DESCRIPTION	QTY.
A	DA8-5502-1B	Cover, Yellow	1
B	DA8-5503-1	Contact, Power	4
C	DA8-5503-2	Contact, Relay	2
D	DA8-5505	Wrench, Allen 5/32"	1
